The Power of Omegas

DHA from Algal Oil

ONAVITA™ DHA is a high-quality, non-GMO algal-based Omega-3, made in the USA and supported by an innovative and reliable partner who can help you optimize taste, texture, nutrition and function in your supplement products.

WHY ONAVITA DHA?

- Non-GMO algal oil
- Vegan/Vegetarian
- Allergen free
- Clean and clear label

WITH ADM, you'll get high-quality, algal-based DHA plus:

- An alternative to fish-sourced Omega-3s
- High-quality, controlled and reliable algal-based supply from the U.S.
- Dependable customer service

APPLICATIONS

- Traditional supplements
- Gel caps & capsules
- Gummies
- Soft chews
- Supplement beverages

Create consumer-preferred products that help improve cognitive, heart and eye health leveraging our unrivaled portfolio of ingredients and unparalleled applications expertise.

Onavita™ is a high-quality, non-GMO product line of Omega-3s from ADM.

WHY OMEGA-3s?

Omega-3 fatty acids are considered important nutrients for humans, vital for proper cell function and credited with key benefits for the brain and body, including cognitive development and heart & eye health.

Omega-3 DHA is a naturally occurring substance found throughout the body and concentrated in the brain, eyes and heart. It contributes to healthy nervous system development and function throughout all stages of life.

Omega-3 ALA is the essential Omega-3 necessary for normal human growth and development. ALA must be obtained through diet or supplementation since it's not produced by the body. ALA is needed to make DHA & EPA and has been credited with maintaining the health of the cardiovascular system.

Product	Content (% Minimum)	Free Fatty Acids (% Maximum)	Peroxide Value (meq/kg, Maximum)	Moisture (% Maximum)
Onavita™ DHA Algal Oil	32% DHA	0.12%	5	0.10%
Onavita™ Flaxseed Oil	50% ALA	0.12%	5	0.05%
