

Microbiome as the Root of Wellness

Consumer are increasingly connecting the health of their microbiome to their overall immunity and well-being and are proactively seeking personalized foods and ingredients that fortify gut health. They are also often looking to combine this with options to relieve stress and anxiety and boost sleep and energy to support their overall health and wellness.

A Winning Edge – Why ADM

- Proprietary, in-house probiotics tailored towards functional health (skin health, metabolic and digestive health, immunity)
- Science-based know-how and capabilities to transfer across market segments in both Human and Animal Nutrition
- Vast array of functional ingredients to blend and tailor towards personalized, science-backed functional health solutions
- Health & Wellness solutions for Human and Animal industry segments
- Microbiome solutions designed specifically for infants, toddlers, and young children

Growth Opportunities

- Fibers that support healthy digestion and gut microflora – good bacteria associated with healthful properties – including prebiotics, starches and newer fiber formulations (e.g., those from cacti, tubers, and bamboo)
- Products, ingredients, and production methods that emphasize natural, fermented, and living foods
- Combined pre/pro/synbiotics for more targeted gut health solutions and additional functional ingredients that go beyond gut health
