

Plant-Based Lifestyles

Plant-based eating has gone mainstream as consumers look to accessible, inherently functional and wholesome plant-based nutrition to support healthy and environmentally friendly lifestyles. They embrace innovations that deliver on taste and texture expectations, with rising standards related to clean processing and real ingredients.

A Winning Edge – Why ADM

Growth Opportunities

- Inherently functional, plant-based, targeted nutrition
- Future-proofed health halo via real, simple ingredients and sourcing narratives
- Accessible through flexible formats, affordable pricing and kid-friendly flavors
- Plant-based versions of traditional, authentic regional cuisine with well-sourced local or regional specificity
- Expertise in alternative proteins and flavors for full solutions in plant-based capabilities for meat and dairy replacement, as well as formulations with plant protein blends
- Established experience with flavors, colors, and integrated nutrition solutions and product development know-how across a range of food and beverage product formats
- Access to an unparalleled portfolio for integrated, turnkey solutions
- A global network of diverse, nutrient-dense protein solutions that offer great taste and texture
- Botanicals to elevate flavor and nutritional profile
