

Sustainable Goodness

Consumers view sustainability more holistically than ever before as they connect it to what is right and just for themselves, their family, the community, environment and, ultimately, the future of humanity. Consumers see it as a moral imperative for companies to take action within the supply chain to protect environmental and social aspects of agriculture

Growth Opportunities

- Beyond organic claims, certifications and narratives (e.g., regenerative agriculture)
- Innovations that work towards drawing down carbon
- Protecting social and human rights in the supply chain
- Reduction of food waste

A Winning Edge – Why ADM

- Farmer and grower programs, connecting farming to final product and bringing increased transparency to supply chains
- Strong link to sustainability commitments and policies to help brands and companies achieve ESG goals aligned to the UN's Sustainable Development Goals
- Over 13,000,000 acres of ADM's supply chain involved in sustainable agriculture projects and programs
