Making Sustainable Attainable

Perhaps more than ever before, consumers want to understand everything—from farm to table—about what they eat, and they have a real interest in sustainably grown food. This desire for transparency creates an opportunity for growers and manufacturers who are able to meet the demand for products made with sustainably sourced wheat flour.

With a commitment to excellence and true transparency, ADM helps our customers achieve their sustainability goals—and make genuine connections with growers and consumers alike.

TRANSPARENCY MATTERS TO CONSUMERS
and sustainability is more than a buzzword

Though sustainability may mean different things to different people, one thing is clear: it’s top-of-mind for today’s consumers, who want to know more about what they eat.
From a Holistic Viewpoint

Successful sustainability outcomes require a multi-faceted approach. In order to help our customers meet growing demand for sustainably sourced flour, ADM offers a variety of programs that can deliver on these commitments.

Transparency & Messaging:
MAKING CONNECTIONS WITH GROWERS, ENVIRONMENT, CUSTOMERS AND CONSUMERS

Our Grower Connect™ program has grown from our legacy of deep-rooted relationships with our farmers. By communicating throughout the growing and harvest seasons, we ensure the consistency and quality of our ingredients. By supporting our growers with technology and resources, we help them to implement sustainable practices with positive environmental and economic outcomes. And, by sharing grower profiles, we provide transparency about the people and places producing our ingredients, to strengthen the connection between consumers and the foods they buy.

MEET THE BAUMS
ADM.COM/THEBAUMS
Field to Market®, The Alliance for Sustainable Agriculture brings together a diverse group of grower organizations; agribusinesses; food, beverage, restaurant and retail companies; conservation groups; universities and public sector partners to focus on defining, measuring and advancing the sustainability of food, fiber and fuel production. This outcomes-based program uses a common measurement framework to help farmers support field-level improvements and allow manufacturers to make credible supply chain sustainability claims.

Fieldprint™ platform, growers can assess the environmental performance of their management practices against benchmarks for eight key sustainability indicators, documenting and demonstrating their sustainability in areas including:

- Land Use & Efficiency
- Soil Conservation & Soil Carbon
- Energy Use & Greenhouse Gas Emissions
- Irrigated Water Use & Water Quality

Field to Market® CONNECTING CUSTOMERS WITH SUSTAINABLY SOURCED FLOUR

ADM FIELD TO MARKET SUSTAINABLE AGRICULTURE PROJECTS - 750,000+ Acres
Your First Call for Sustainable Supply
From grower profiles to metrics-backed sustainable sourcing and third party endorsement, ADM has the connections, expertise and a menu of options to help achieve your sustainability goals.

A Deep Commitment to Sustainability

ADM is a company with deep roots in agriculture. We understand the importance of being good stewards of land, water and air—all of which are critical to our business and the people we serve. And as we have grown and evolved in recent years, our commitment to sustainable practices and environmental responsibility has grown along with us.

Every milled product from ADM comes with unmatched people power—over 100 years of built-in experience, knowledge, performance and reliability, paired with the latest industry know-how and technical advancements. We leverage our deep agricultural roots and grower partnerships, world class origination, and advanced transportation network to support your business success. We’re located closer to the crops and supply points where you need us most, so we can give you the service and speed to market you need to succeed.
