[The Forest Trust](#)

Sustainability Statement Palm Kernel Expeller

ADM committed to No Deforestation, No Peat, and No Exploitation ([No DPE](#)) in our palm oil supply chains in March 2015. In May 2015, we began a partnership with [The Forest Trust](#) (TFT) to implement this commitment and build traceable and transparent agricultural supply chains. ADM has worked with TFT to carry out an analysis of our global palm oil supply chain, and identify palm oil mills in ADM’s supply chain. ADM engages with direct palm suppliers to understand their progress and challenges in complying with ADM’s No DPE Policy, and to support suppliers to change social and environmental practices. By identifying and procuring from suppliers with shared values, ADM is actively participating in the transformation of the palm supply chain. For more information, please visit our [Sustainability Progress Tracker](#).

Since Palm Kernel Expeller (PKE) is a by-product, and thereby has less influence on global supply chains, ADM has prioritized work on Palm Oil and Palm Kernel Oil supply chains to date. Significant progress has been made on Palm Oil and Palm Kernel supply, and ADM now intends to build a deeper understanding of traceability in the Palm Kernel Expeller supply chain. ADM’s initial aims in the PKE supply chain are to analyze the geographic overlap between the Palm Kernel Expeller and Palm Oil sourcing, identify links between the PKE supply chain and existing transformation projects in the field, and identify new transformation focus areas in the event PKE and Palm Oil origins differ significantly.

In 2017, ADM imported Palm Kernel Expeller of Malaysian and Indonesian origin to New Zealand, mainly exported from the ports of Belawan, Padang, Kuantan, Lumut, Pasir Gudang and Port Klang and therewith originating from following regions: North Sumatra, West Sumatra, Pahang, Perak, Selangor, Johor, Riau, Lampung. See Table 1 and Annex II.

Origin	Port	%
Indonesia	Belawan	19
Indonesia	Lubuk Gaung	4
Indonesia	Panjang	4
Indonesia	Dumai	3
Indonesia	Padang	13
Malaysia	Kuantan	18
Malaysia	Lumut	14
Malaysia	Pasir Gudang	12
Malaysia	Port Klang	13
TOTAL		100

Consistent with the New Zealand Import Health Standard, ADM only imports Palm Kernel Expeller from approved sources to New Zealand. Most of these suppliers are members of the RSPO¹ (Annex I) which entails commitment to support, promote and work towards the production, procurement and use of sustainable palm supply chains.

Furthermore, ADM’s internal feed safety procedures require ADM to source only from GMP+ certified² terminals and warehouses which themselves can also only source from GMP+ certified kernel crushing plants, many of which are also RSPO certified.

Table 1: PKE imports to New Zealand in 2017 by load port

Consequently ADM can also procure sustainability credits on customer demand which are available on the RSPO PalmTrace Trading Platform. An [RSPO credit](#) is proof that one tonne of certified Palm Kernel Expeller was produced by an RSPO-certified kernel crushing plant or independent smallholder, and has entered the global palm oil supply chain. By purchasing credits, buyers encourage the production of certified sustainable palm. For current bid and ask indications please click [here](#).
