## Verification methodology Traceability

- 1) A sample equal to the square root of the total number of mills in the origin country was taken based on a risk-based approach including the following variables: volumes delivered, location, origin refineries.
- 2) Reported traceability figures by ADM for all the refineries included in the scope were reviewed by cross checking information for the mills selected for the sample and delivering to a specific refinery. Incoming delivery documents were reviewed and traceability score cross checked using the following formula:  $(\text{Total traceable volumes per refinery} / \text{Total purchased volumes per refinery}) \times 100$ . A mill was considered traceable when the following information were available: full name, parent company name, correct latitude/longitude. A mill volume was considered traceable to plantation based on self-declared information received by the supplier.
- 3) Control Union's responsibility was to exclusively verify the accurateness and completeness of the information as received by ADM, and ADM methodology and processes for the calculation of the traceability scores for the facilities included in the scope. How ADM's suppliers gather and process any self-reported information supplied to ADM on both TTM and TTP was not included in the scope of this verification.

## Verification methodology IRF Data

- 1) The methodology described in the *NDPE Data Verification Protocol version November 2020* was used for this verification
- 2) Being an intermediary actor in the palm value chain, ADM may receive aggregated IRF information from up-stream suppliers. This aggregated information may or may not have been previously verified by an independent party.
- 4) Control Union's responsibility was to exclusively verify the accurateness and completeness of the self-reported aggregated information as received by ADM, and ADM methodology and processes for the calculation of the IRF profiles for the facilities in scope. Hence, the verified status included in this statement refers to the accurateness of ADM's processes, and not to the volumes received by their upstream suppliers. How ADM's suppliers gather and process any self-reported IRF information supplied to ADM was not included in the scope of this verification.
